Bug Report

Title: User can't choose payment method

Reported by: Nikolas Nosal, xnosal01, xnosal01@stud.fit.vutbr.cz

Date: 19/04/2024

Description: When the user reaches the checkout page and tries to select a payment method, no options are available. This prevents the user from completing the purchase.

Steps to reproduce:

1. Navigate to the OpenCart website.
2. Add a product to the cart.
3. Proceed to the checkout page.
4. Fill out requested user information.
5. Try to select a payment method.

Expected result: The user should be able to select a payment method and complete the purchase.

Actual result: No payment methods are available for selection.

OS: Windows 11, 23H2 (22631)

Browser: Chrome 111.0

Test Case

```
Scenario: Complete Purchase
  Given the user is on the OpenCart website
  And a user is on the checkout page
  When the user fills payment information
  And confirms the purchase
  Then the user should receive confirmation of the purchase
```

Test Log

```
Scenario: Complete Purchase                        # product_search_and_purchase.feature:58
  Given the user is on the OpenCart website         # steps/product_search_and_purchase_test.py:9
  Given a user is on the checkout page              # steps/product_search_and_purchase_test.py:161
  When the user fills payment information           # steps/product_search_and_purchase_test.py:165
  And confirms the purchase                         # None
  Then the user should receive confirmation of the purchase # None
```
